Advice & Insurance

Welcome to visitors and buyers to Colemans Annual Charolai bull sale

Bull sale Tuesday 23-05-2023 1pm onwards

Last season was dominated with kikuyu followed by a wet winter and this past season has been a continuation record for kikuyu on our property. With the return of wet area rushes which we thought had been dramatically reduced now are a major comeback. A few trees blown over let us off light, nation wide the climatic conditions this past season for some has been horrendous damage and adapting to environment change is a challenge for us all.

In the local weaner fairs Charolais cross are leading the way. Our spring crossbred calves weighed in at 331 kilo's and we note the present demand from the dairy industry as the colour code is a stamp of identification and the poll gene cutting dehorning costs. As the forestry spreads the impact on Northlands hill country, cow reduction will flow onto bull sales and we note some past buyers are now carbon farming.

This years bulls are sired by

Moonlight Noddy N36 son of Palgrove Awesome

RJC Newton N4 a son of Palgrove Hallmark (AI)

Nouvelle Moby by Simca Hills Hobart H23

RJC Ording 035 sired by Ritmo (AI)

CF P102 Pybolin son of Symbol (AI)

Dalmas Casino 375C son of Exotic SC. French pedigree

HRJ Bulletproof 411B son of red genetics Sparrows Kingston 139Y

The genetic base through (AI) is huge and we have two new ones at this year's sale. It is exciting to have such a spread of genetic gain here in the heart of Bay of Islands, New Zealand.

The bull's weights were recorded in March. The latest data, 600 day EBVs might be ready by sale day other wise its based on the 400 day weights.

Calves are weigh band at birth and Nait tagged with their permanent number ear tag is added at weaning.

Thank you for attending we welcome feedback.

We wish all success with your purchases. If you would like a video of a bull please email us and we shall send you a video clip of the bull in the paddock. john.lily@kinect.co.nz

Kind regards from the Coleman family John & Lily, Richard & Hinari, Sue & Jacky

EBV'S EXPLANATION

Estimated Breeding Values (EBV's)- EBVs for the growth traits are calculated in kilograms. The EBVs for the growth traits are calculated in kilograms. The EBV is the best estimate of an animal's genetic merit for that trait.

Birth Weight EBV- This EBV gives an estimation of the animals breeding value for birth weight. The lower the EBV, the lower the birthweight.

200-Day Growth EBV- Estimation of the animal's genetic merit for 200 day growth calculated independently for the maternal milk effect.

400 Day Weight EBV- This EBV gives us an estimation of the animal's yearling weight potential.

600-Day Weight EBV- This EBV is an estimation of the animal's genetic potential for growth to 600 days (18 months).
