

TAIAROA & COTSWOLD CHAROLAIS

Certified Charolais

**22nd Charolais Bull Sale
Monday 23rd May 2016 at 2p.m.**

**Offering: 28 Polled & Horned
Rising Two Year Old Bulls**

Agents: PGG Wrightson

Roger Keach — 0274 325 766

Ryan Dowling — 0274 347 239

Purchasing Rebate

All intending purchasers are required to register at the office prior to the sale. A purchasing rebate of 6% will then be paid to non participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale. Arrangements must be made prior to the sale and settlement made on the purchaser's behalf within 14 days.
THERE IS NO EXCEPTION TO THIS RULE.

A very warm welcome to our 22 nd annual bull sale. We would especially like to welcome our repeat buyers. Thankyou for coming, we do appreciate your support.

The weather has dominated yet again, and it seems the weather experts were correct with their prediction of El Nino.

It has been an extremely challenging summer, and seems we will be in for a tough winter with below average swede crops and minimal feed on the hill.

Drew and Carolyn attended the NZ Charolais Cattle Society AGM at Hamilton in March.

We visited three Charolais studs and were impressed with the cattle and enjoyed looking at the lush green pastures of the Waikato.

We had a tour through the Gallagher factory, and while we associate Gallagher with electric fence equipment we soon learnt that this is only a small proportion of their production.

Gallagher are also involved with security (thumb print and card entry) and also produce over 80% of fuel pumps at service stations in NZ.

The visit to the Cambridge Velodrome was interesting and we can only wonder how the cyclists stay upright with the steep gradient on the cycle track !!

As usual we are concentrating on temperament and production. We are confident that these cattle will shift anywhere in New Zealand.

Charolais cross calves continue to dominate at the weaner calf sales, our congratulations to all the vendors.

Current weights and average daily gains will be available on sale day.

The sale bulls will be yarded ready for inspection from 12.30 p.m. and a light luncheon will be available.

We trust you will have a pleasant afternoon at Paerau and invite you to enjoy our hospitality at the conclusion of the sale.

We would like to know how our bulls are performing so please keep in touch and give us any feedback that you may have whether positive or negative.

Drew, Carolyn & Don.

Conditions of Sale.

- This sale will be conducted under the conditions of the New Zealand Stock and Station Agent Association.
- Each lot will be at the risk of the purchaser as from the fall of the hammer. No error, omission or misdescription will in any form invalidate the sale.
- The herd status is C10
- Free delivery in the South Island and to Feilding in the North Island
- The vendor reserved the right to change the order of the catalogue.
- All bulls have passed a veterinary examination of genitalia and semen evaluation prior to sale.
These bulls were blood tested negative for the BVD antigen (carrier/PI status). They have received two vaccinations (sensitiser and booster) of Bovillus BVD vaccine one month apart, prior to sale. David R.H. Robertson BSc BVSc, Veterinary Centre.
- Any proven infertility will result in the buyer choosing a replacement animal or a refund, at the vendor's discretion.
- This sale is conducted on a working farm, so please exercise care to ensure your personal safety.

Estimated Breeding Values E.B.V

EBV's are an estimate of the true breeding value of an individual as a parent. Performance data and pedigree information from all animals in a database are used (along with trait heritabilities and genetic correlations) to calculate EBV.

Accuracy

Accuracy is presented with each EBV and gives an indication of the amount of information used. The higher the accuracy the more likely a bull will breed true to its EBV.

Using the EBV

As we do not weigh the animals at birth, a birth EBV is the result of known information from their relatives.

200 day Milk EBV

This EBV is important for breeding replacement heifers with superior milking ability.

200 day Growth EBV

This is calculated independently for the maternal milk effect. If you sell weaner calves this is an important EBV

400 & 600 Day Weight EBV

These give estimation of the animal's yearling weight potential and beyond.

The following table shows the average EBV for all bulls in NZCCS analysis

	BW	200 Day	400 Day	600 Day
NZCCS	1.05	20.8	36.8	41.7
Taiaroa	1.74	21.1	39.7	45.6
Cotswold	1.67	21.5	38.9	48.7
