19th Charolais Bull Sale
Monday 20 May 2013 at 2 p.m.

Offering: 23 Rising Two Year Old Bulls

Agents: PGG Wrightson
Roger Keach — 0274 325 766
Ryan Dowling — 0274 347 239

6% Purchasing commission to outside companies operating at the sale.

A very warm welcome to our 19 th annual bull sale. We would especially like to welcome our repeat buyers. Thankyou for coming, we do appreciate your support. We are pleased to present the sale bulls this year, with sons of Cotswold Admiral A53, Complete C53 from Don Organ in Napier. We also have two homebred sires Taiaroa Clements C49 & Dungannon D88.

We were pleased with the Waipiata, Palmerston & Balclutha weaner calf sales this year. The Charolais cross calves showed depth, growth and muscularity, with Taiaroa genetics showing favourably in the prices. We have been collating the calf sales and the following table shows the Charolais cross calves strength at the sales.

	Charolais Steer price	Charolais Heifer price
Palmerston	\$613 /hd	\$505/hd
Balclutha	\$712 /hd	\$615/hd
Castlerock	\$619/hd	\$498/hd
Waipiata	\$686/hd	\$498/hd
Palmerston	\$552/hd	\$431/hd
Castlerock	\$618/hd	\$485/hd

Analysing the data, showed that the majority of the Charolais cross calves were sold in the first round of sales. The sales that we attended showed magnificent lines of calves exhibiting the Charolais traits of good weights, definite colour marking and these calves were sought after by the buyers. Our congratulations go to all vendors.

We are pleased to announce that we have entered into a joint venture agreement with Don Organ (Cotswold Charolais - Napier). Previously we have used Cotswold genetics , and respect Don’s expertise as a stud master and believe the Cotswold stud is one of the top in NZ. This has given us a great opportunity to strengthen our stud, and working with Don will allow us to extend our stud stock knowledge. Next year we will have the first of the Cotswold R2 bulls at our sale.

The bulls were eye muscle scanned and structurally assessed by Bill Austin on the 5 th April 2013. In the catalogue there is an explanation of the 9 scores which were assigned to each bull.

The sale bulls have been performance tested with the NZ Charolais across herd analysis. Central Vets Ltd have palpated all sale bulls for testicular abnormalities and measured their scrotal circumference. All bulls were blood tested negative to a Bovine Viral Diarrhoea (BVD) antigen (virus) test to ensure no bulls are persistently infected with BVD virus. They have also been vaccinated with 2 doses of Pregsure BVD vaccine to ensure their fertility is not affected if they are introduced in to herds with BVD virus present.

Current weights and average daily gains will be available on sale day. The sale bulls will be yarded ready for inspection from 12.30 p.m. and a light luncheon will be available.

We trust you will have a pleasant afternoon at Paerau and invite you to enjoy our hospitality at the conclusion of the sale.

Drew & Carolyn

Conditions of Sale.

- This sale will be conducted under the conditions of the Otago Stock and Station Agent Association.
- Each lot will be at the risk of the purchaser as from the fall of the hammer. No error, omission or misdescription will in any form invalidate the sale.
- The herd status is C10
- Buyers are advised to complete the instruction form in the catalogue as to transport, insurances and transfers.
- All cattle are guaranteed and have been veterinary inspected.
- Any proven infertility will result in the buyer choosing a replacement animal or a refund will be given.

Estimated Breeding Values E.B.V.

EBV are an estimate of the true breeding value of an individual as a parent. Performance data and pedigree information from all animals in a database are used (along with trait heritabilities and genetic correlations) to calculate EBV.

Accuracy

Accuracy is presented with each E.B.V. and gives an indication of the amount of information used. The higher the accuracy the more likely a bull will breed true to its EBV.

Using the E.B.V.

As we do not weigh the animals at birth a birth E.B.V. is the result of known information from their relatives.

200 day Milk E.B.V.

This E.B.V. is important for breeding replacement heifers with superior milking ability.

200 Day Growth E.B.V.

This is calculated independently for the maternal milk effect. If you sell weaner calves this is an important E.B.V.

400 & 600 Day Weight E.B.V.

These give an estimation of the animal's yearling weight potential and beyond.

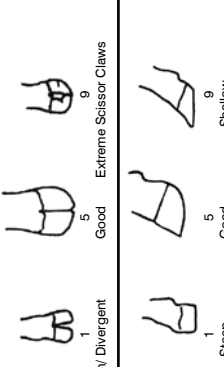

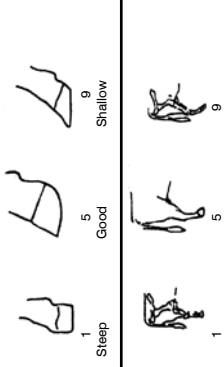

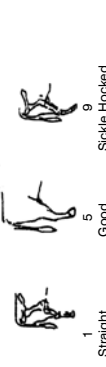

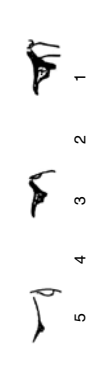

How to use the Beef Class System

- We have tried to keep the system simple and easy to use.
- Basically, all structural traits presented in this catalogue are presented in the same format.
- A Score of 5 is ideal.
- 4 and 6 show slight variation from ideal but this includes most animals.

NOTE: Structure scores should be used as a *guide only, not a guarantee.*

Any animal scoring 4 and 6 would be acceptable in any breeding program.

- 1 and 9 should not be catalogued and are considered culls.
- 3 and 7 shows great variation, but would be acceptable in most commercial breeding programs, but seed stock produces should be wary
- 2 and 8 are low scoring animals and should be looked at closely before purchasing.

Description	Trait	Scoring Range
1 - open divergent; 5 - good; 9 - extreme scissor claw 1 - open divergent; 5 - good; 9 - extreme scissor claw	Front Feet Claw Set Rear Feet Claw Set	
1 - steep (stubbed toe); 5 - good; 9 - shallow heel 1 - steep (stubbed toe); 5 - good; 9 - shallow heel	Front Feet Angle Rear Feet Angle	
1 - straight (post legged); 5 - good; 9 - sickle hocked	Rear Legs Side View	
1 - bow legged; 5 - good; 9 - cow hocked	Rear Legs Hind View	
1 - lacking capacity; 5 - large volume	Capacity	
1 extremely quiet; 5 - aggressive/extremely agitated in crush	Temperament (Docility) Crush or yard score	
1 - extremely pendulous; 5 - extremely clean/tight to body	Sheath and Navel score
